Date: June 14, 2010

Mr. Gary Burningham
President
Rock Creek Gypsum, LLC
95 North 200 East
American Fork, UT 84003

Dear Mr. Burningham,

This letter is to document our site visit and inspection of your special use permit of the Rock Creek Gypsum Mine and associated activities with Brandon Steele (Corporate Secretary), Robert Steele (associate), Duane Resare, and myself on June 10, 2010. The visit was informative and assisted both parties in the expectation of complying with the terms and conditions of your special use permit.

The inspection found the following:

1. The road access was in good repair.
2. Please remember to complete noxious weed control. Several different noxious weeds, white top and thistle were pointed out.
3. When spoil piles are not going to be used for more than two years, they need to be seeded in order to prevent erosion and noxious weed infestation.
4. An updated notification needs to be given on foreseeable changes from the previous year's Plan of Operations. If there are no changes, an e-mail note for our records will be adequate.
5. Exploration roads and associated drilling have not been reclaimed as soon as practical. This is a noncompliance issue that needs immediate attention. Pursuant to part V, subpart C – Opportunity to take corrective action, you are hereby given 90 days starting from June 14, 2010, to remedy this action by September 12, 2010. Failure to remedy this noncompliance could result in suspension or revoking of your permit in whole or part.

Please call me or Duane Resare if you have any questions at 801-798-3571.

Sincerely,

DOUGLAS H. JONES
DISTRICT RANGER

cc: David Ream
